New Faces Of Paris Monuments

The ever young face of Paris has taken on a new complexion, and Canadian visitors this year will see patterns of beauty they didn't know existed in the French capital.

For almost a year, Parisians have kept busily occupied with meticulous and expert cleaning of their noblest landmarks. Many architectural masterpieces now reveal original 17th and 18th century lustre.

Travelers with a keen eye may have a first, distant glimpse of this new face of Paris as their Air France 707 Intercontinental jetliner wings over the capital before landing at Orly Airport. After arrival they can view many fine building profiles which date back to a royal age.

Typical is the east facade of the Louvre Palace and colonnade pictured above. Distinctly visible are the pediments, capitals, and decorative sculpture.

Raising the veil from the

past, more than 30 specialists and workmen spent nearly seven weeks cleaning the Louvre with water under high pressure. The delicate surface is now as it was in 1870, when the Louvre was built.

According to Air France, the airline which flies more travelers to Paris than any other, some of the recently scrubbed masterpieces are the Mini built in 1775, the Institute of France, the Invalides, Madeleine Church, and Chamber of Deputies. Air France travelers to Paris, interested in watching the centuries washed clean, can observe work still in progress on other civic monuments.

Make The Most of Vacation Time

There are still a few mothers
around who dread summer vaca-
tion time.

For them the thought of school
being closed for two months seems
almost too much to bear. However,
this situation need not be quite so
tragic as it appears. With a little
planning, summer can, indeed, be
pleasant and rewarding — for all
the family.

Summer is really an ideal time
for families to do things together.
The very fact that school is closed
means that there's more time to
relax, to talk things over, and per-
haps make plans for the future.
One major complaint of modern
society is that too much of a child's
training is controlled by organiza-
tions beyond the home. Summer,
then, seems an ideal time to re-
verse this process.

During the summer months, of
course, everyone wants to be out-

doors. The back yard at home can
become the centre of several fam-
ily activities. Many back yards are
large enough for a croquet court,
a badminton court, or even a mini-
ature golf course. Tennis and vol-
ley-ball and other healthful sports
that are ideal for the large back
yard. Swings and see-saws never
fail to amuse younger children
throughout long summer days.

The back yard can also be the
pleasant setting for many summer
meals. Nothing tastes quite so
tempting as a lunch or supper
served in the open air.

Children, especially, enjoy hav-
ing their noon-day meals in this
style — and when soft drinks are
provided, their delight is complete.

These carbonated beverages do
please youngsters of all ages, and
never fail to whet lagging appeti-
tes on the warmest days. Carbon-
ated beverages actually aid in the
digestion of other foods.

Summary of VHT Act Amendments

Amendments to the Vehicle and Highways Traffic Act were assented to March 29, 1963. These amendments have made several changes in our traffic laws that will affect the average driver. The following is a resume of changes that may be of interest to motorists and to farmers residing in rural areas.

Operator's Licence

Sec. 16 (8) "No person under the

age of sixteen years shall drive a tractor or self-propelled implement of husbandry on a main or secondary highway within the meaning of THE PUBLIC HIGHWAYS ACT".

(8a) "No person shall permit another person under the age of sixteen years to drive a tractor or a self-propelled implement of husbandry on such main or secondary highway."

(8b) "No person under the age of fourteen years shall drive a tractor or a self-propelled im-

plement of husbandry on a highway."

(8c) "No person shall permit another person under the age of fourteen years to drive a tractor or a self-propelled implement of husbandry on a highway."

These changes mean that anyone under the age of fourteen can no longer drive farm implements on any type of public road, and no one under the age of sixteen can drive a tractor or a farm implement on a main or secondary highway. These main and secondary highways are normally provincial roads with a designated highway number.

Sec. 16 (11) "An operator's licence of a learner's category may be issued for the purpose of operating a motorcycle, scooter or power bicycle under such terms and conditions as may be prescribed by the Lieut.-Governor-in-Council."

This means that a boy or a girl with an "L" Operator's Licence can drive a scooter or a motorcycle without being accompanied by a fully licensed driver as such would be impractical; however, when driving a car, or a truck under 6,000 lbs., they must be accompanied by a fully licensed driver.

Sec. 17b (3) "Where the operator's licence of any person is suspended by or under this Act by an order or judgment made under this Act that person may still operate road maintenance equipment not required to be licensed under this Act."

This section is self-explanatory.

Equipment
Sec. 35a (10) "If a tractor or self-propelled implement of husbandry is equipped with headlights, it shall not be equipped with any less or no more than two headlights."

Sec. 42 (1) "Every motor vehicle except a motorcycle, and every trailer and vehicle being drawn at the end of a train of vehicles shall be equipped with at least two tail lamps mounted on the rear of the vehicle."

(1a) "A motorcycle, a self-

propelled implement of husbandry and a tractor shall be equipped with at least, one tail lamp mounted on the rear of the vehicle."

(2) "A tail lamp shall be capable, when lit as required by this Act, of emitting a red light plainly visible from a distance of not less than five hundred feet to the rear of the vehicle, except that in the case of a train of vehicles only the tail lamps on the rear most vehicle need be seen from that distance."

Self-propelled farm implements when operated on any road at night must have two lights that illuminate 200 feet ahead at speed of 25 - 35 m.p.h. and at least one red tail light that is plainly visible for 500 feet to the rear. All motor vehicles and trailers must be equipped with two tail lights that work when required.

Sec. 52 (1) "A motor vehicle other than a motorcycle, shall be equipped with at least two stop lamps mounted on the rear, and a motorcycle shall be equipped with at least one stop lamp mounted on the rear of the vehicle."

(2) "A stop lamp shall be capable of being lit when the service brake is applied and when lit shall be capable of emitting a red light plainly visible from a distance of not less than one hundred feet to the rear of the vehicle in normal sunlight."

This new Provision includes all cars and trucks, regardless of year or model, with the exception of motorcycles.

One Man's Hobby— Making Model Coaches

Mr. A. A. Thompson of Lethbridge, has a special way of keeping busy. Retired from Sicks' Lethbridge Brewery Ltd., 10 years ago, he describes his fascinating hobby as "simply making things".

His latest creation is a scale model Napoleon coach. This is the coach used by General Motors as the basis for their famous "Body by Fisher" insignia.

It was built to scale from plans supplied by General Motors. The coach includes such detailed parts as tiny fold-away steps, sliding glass windows, doors that open and latch shut; springs supporting the passenger section of the coach and intricately detailed upholstery. These details to the coach were carved, twisted, soldered or sewed from an assortment of materials. The model took over 100 hours to build.

The coach is the latest of 13 such models. The collection, all hand-made, includes coaches, wagons, sleighs, cutters, farm wagons, Red River carts and even a Surrey-with-the-fringe-on-top.

Mr. Thompson's models won a bronze medal when he exhibited his models at the Pacific National

Exhibition in Vancouver in 1961. This year he may take them to Vancouver again for the Exhibition and to Toronto for the Canadian National Exhibition.

In Memoriam

In Loving Memory of a Dear Mother, Mother-in-law and Grandmother, Carmela Ferrara, Who Passed Away July 3, 1962:

We had a Mother we were proud to own.
How much we miss her will never be known.

The heartaches in this world are many,
But to lose our Mother was the greatest of any.
To have you, Dear Mother, and your loving ways,
To live once again those happy days.

So you who have a Mother,
Cherish her with care,
For you will never know the heartache

Till you see her vacant chair.
Sadly missed by her Sons,
Daughter and Families.
